## **Braai: The South African Barbecue Book**

By gaining an understanding of the complex interactions between infectious disease, ecology, and the physical environment, we can develop predictive models of infectious diseases that in turn will allow us to develop a preemptive medicine: that is, to mitigate the impact of infectious disease, if not to prevent it by having an early warning system to initiate appropriate and responsive public health measures. They will need to stay ahead of the information curve and learn to leverage information for business results.
